

Retouching full-sized photos on iPhone - New update makes it possible

Published on 07/18/10

Adva-Soft has announced TouchRetouch 1.0.1, an update to their photo retouching tool for iPhone and iPod touch. TouchRetouch is the only portable tool that lets you to remove unwanted content from your photos to achieve new outstanding look. TouchRetouch can remove any object, giving the gorgeous look of your photo with a swipe or tap of the finger. Version 1.0.1 now works with photos in their original resolution and allows you to send pictures via e-mail.

Lviv, Ukraine - Adva-Soft announces the availability of TouchRetouch update (version 1.0.1) for iPhone and iPod touch. TouchRetouch is the only portable tool that lets you to remove unwanted content from your photos to achieve new outstanding look. The new version works with photos in their original resolution and allows you to send pictures via e-mail.

Once Upon A Touch:

Ever since people had digital images, they wanted photos to look great. But there was always something in the way - something that destroys your perfect composition. Great news - TouchRetouch can remove any object, giving the gorgeous look of your photo with a swipe or tap of the finger.

Anyone Can Do It:

You don't have to be a professional photographer to see imperfections on your photos. Yet, until the app was released, retouch capability was only available in complex software products that are more suitable for professionals rather than regular users, not to talk about their price. TouchRetouch is one of a kind app for iPhone. No surprise that brilliant implementation of such a craved feature attracted a lot of attention, turning TouchRetouch into a top-selling Photography app worldwide.

Photo Retouch Made Easier:

With TouchRetouch photo editing is extremely simple all the way. All that's required is marking the content or objects to be removed from a picture before hitting the 'Go' button. Editing takes just a few minutes of your time. Following the users' feedback, developers enriched the app with the most desirable features.

Now TouchRetouch can work with images in their native resolution. In addition, there is also a set of pre-defined resolutions for you to select from. With new updated TouchRetouch nothing stops you from sharing great retouched images with your friends and family, especially since the new version lets you to send images via e-mail.

Portable Photo Editing + You = Fun:

TouchRetouch also provides a great deal of entertainment and playground for your creativity. You can make funny pictures by removing elements people would expect to see, e.g., all candles on the cake when a person is blowing them out. TouchRetouch is a great bargain for anyone who is passionate about photography. Engaging portable photo editing, support of original image resolution and handy opportunity to send images via e-mail will ensure many pleasant moments for you and your friends.
